

AI WITHOUT GETTING BURNED

Grab a seat. Open your laptop. Three things before we start.

- 1 Get on the wifi.
- 2 Go to **claude.ai** and sign in, or make a free account.
- 3 Put your name on a tag so the person next to you knows who you are.

WIFI NETWORK

PASSWORD

AI WITHOUT GETTING BURNED

In ninety minutes you build three tools, on your own laptop, that work in any AI you pick up. Tonight's, next year's, whatever comes after that.

SO NOBODY IS GUESSING

WHAT TONIGHT IS

THIS IS

- Hands-on. Your laptop stays open the whole time.
- You build. I am not demoing at you.
- Everything you make tonight is yours, and it moves anywhere.

THIS IS NOT

- A software pitch. I am not selling you a tool.
- A coding class. Nobody writes code tonight.
- A list of 40 apps you will never open again.

If you leave with nothing installed, I did this wrong.

HERE IS THE PLAN

- 7:00 What AI is, in plain English
- 7:16 Set up your base, so the tool knows your business
- 7:22 Build the Decision Council, the one I use on my own calls
- 7:50 A live look at what this does on a real business
- 8:10 Build the Simplicity Check
- 8:20 What I do next, what you do next, then your questions

Hold your questions. There is a real Q and A at the end and I will stay for it.

HERE IS HOW OWNERS ACTUALLY GET **BURNED**

It is not the robots.

It is picking one tool, wiring your business around it, and then the tool changes, the price moves, or it stops being the one everybody recommends. Now you start over. Again.

The burn is lock-in.

TOOLS CHANGE. PRINCIPLES DON'T.

I went from ChatGPT to Gemini to Claude, and a few others since, and I never lost a step. Not because I picked right. Because what I own is the way I work with these things, and that moves.

THE SIX THAT TRANSFER

- 1** It predicts from what you give it. **What you hand it is the whole job.**
- 2** Give it your context once. **Reuse it forever.**
- 3** Anything you repeat, **turn into a saved recipe you own.**
- 4** Agentic means it does the work, not just answers you. **You delegate.**
- 5** **Pressure-test your thinking**, then simplify it.
- 6** **Own it. Move it.** Never get locked in.

IT IS A PREDICTION MACHINE, NOT A BRAIN

It reads what you gave it and predicts what should come next, one piece at a time. That is the whole trick.

So a vague ask gets a vague answer. Every time. The fix is on your side of the keyboard.

Garbage in is not an insult. It is a spec.

"AGENTIC" JUST MEANS IT DOES THE WORK

Ask a question, get an answer. That is a chat.

Give it a job, and it goes and does the steps. That is agentic. Same machine, different assignment.

You stop asking. You start delegating.

NOBODY IS BACKSTAGE

The page you registered on and the reminder emails that got you here tonight both run on tools I built and I run myself. I am one person. There is nobody behind the curtain.

That is the part you want. Not the chatbot.

DO THIS NOW

- 1** Open **claude.ai**.
- 2** Make a new **Project**. Name it after your business.
- 3** That is it. Wave if you are stuck and someone will come to you.

Everything else tonight lives inside that project.

THE BUSINESS BRAIN

Fill it in once. Paste it in once. From then on every answer comes back about **your** business, in your voice, with your prices, instead of generic advice for a business that does not exist.

Context once. Reused forever. And it moves to any tool you ever switch to.

FILL IN YOUR BRAIN FILE

My business is

I sell

I sell it to

The problem I solve is

My biggest goal right now is

My prices are

My tone is

Things I say a lot, things I never say

My weekly repeating tasks are

Short answers. Nobody is grading this. Then paste the whole thing into your project instructions.

THE DECISION COUNCIL

The thing I actually use on my own calls. You are about to have it too.

FIVE ADVISORS. ONE VERDICT.

THE CONTRARIAN

argues hard against you.

FIRST PRINCIPLES

names what you are assuming, and which assumption is shaky.

THE EXPANSIONIST

describes the bigger version you talked yourself out of.

THE OUTSIDER

hears it cold, with zero context, like a smart stranger.

THE EXECUTOR

gives you the first move and the thing most likely to kill it.

Then it has to call it. Proceed, change, or kill.

PASTE THIS IN

You are my Decision Council. When I give you a decision, respond as five separate advisors, each in one short paragraph:

1. **THE CONTRARIAN:** argue hard against the decision.
2. **FIRST PRINCIPLES:** list the assumptions I am making and which ones are shaky.
3. **THE EXPANSIONIST:** describe a bolder, bigger version of this.
4. **THE OUTSIDER:** react with zero context, like a smart stranger hearing it cold.
5. **THE EXECUTOR:** give the first concrete step and the single thing most likely to kill it.

Then finish with VERDICT: proceed, change, or kill, in one sentence, and why.
Be direct. No flattery. Do not agree with me by default.

My decision is: [paste your decision here]

DO THIS NOW

- 1** New chat, **inside the project** you already made.
- 2** Paste the instructions.
- 3** Save.

That is the whole install. You now own it.

NOW GIVE IT A REAL ONE

Not a test. Not "should I get a dog." An actual decision sitting on you right now.

- Do I hire the second tech or wait.
- Do I raise prices in September.
- Do I let go of the client who pays late.
- Do I sign the lease.

Type it in. Read what comes back. Then tell the person next to you which one stung.

THE ONE YOU DIDN'T WANT TO READ

One of those five usually says the thing you have been avoiding. That is the whole point. It has no reason to be nice to you, no job to protect, and no interest in your feelings about it.

If all five agree with you, your decision was probably not a decision.

ADD ONE LINE

"Assume this failed badly six months from now. Walk it back and tell me why."

Same council. Different job. It tells you how this goes wrong before it costs you anything.

Cheapest insurance in business.

WHAT THIS LOOKS LIKE ON A **REAL BUSINESS**

I am going to point my setup at a business and show you what it finds. Public information only, and not one of yours.

ME VERSUS THE MACHINE

One task off a real to-do list. I do it by hand. The setup does it beside me. We start at the same time and you watch both.

THAT GAP IS THE OPPORTUNITY

I built that myself, on nights and weekends, and it took a while. You do not need my version. You need the two or three pieces that pay you back first.

Which is a very convenient thing for me to say right before I make you an offer. I will get there. Stay with me.

THE SIMPLICITY CHECK

For every time you are about to build something twice as complicated as the job requires.

FOUR QUESTIONS

- 1 Where is this **overcomplicated**?
- 2 What is the **simplest version** that still works?
- 3 Am I **skipping the basics**?
- 4 What can I **cut right now**?

I run this on myself constantly. It is rude to me weekly.

DO THIS NOW

- 1 Same project. **New chat.**
- 2 Paste the instructions from page 2.
- 3 Give it something you are currently overbuilding.

Brace yourself for question three.

LOOK WHAT YOU JUST DID

- A **Business Brain** that makes every answer about your business.
- A **Decision Council** that pressure-tests your real calls.
- A **Simplicity Check** that cuts what does not need to exist.

Three things you built yourself, sitting on your own laptop. They work in any tool you switch to, and nobody can take them or price you out of them.

A HUMAN APPROVES. THE AI **DRAFTS**.

Nothing that carries your name goes out without you reading it. Not a quote, not a contract, not an email to a customer. That is the brake pedal, and it is the whole safety plan.

TOOLS CHANGE. PRINCIPLES DON'T.

- 1 It predicts from what you give it.
- 2 Context once, reused forever.
- 3 Anything you repeat becomes a recipe you own.
- 4 Agentic means you delegate, not just ask.
- 5 Pressure-test, then simplify.
- 6 Own it. Move it. Never get locked in.

The tools on this screen will look dated. This list will not.

DO THIS NOW

A **skill** is the tool you just built, saved to your account instead of to one project.

- 1** New chat, inside your project.
- 2** Paste the **packaging prompt** from the kit page, station 04.
- 3** A file comes back. Take it. No file? Take the ready made one.

Station 04 on your kit page has all of this with a copy button.

SWITCH IT ON

- 1 Settings, then Capabilities.**
Code execution on.
- 2 Customize, then Skills.**
Different menu.
- 3 Plus, Create skill, Upload a skill.** Pick your file.
- 4** Switch it on.

Then open a **brand new chat** and ask for your council.

I WILL DO THIS WITH YOU. FREE.

You saw a version of this pointed at a business tonight. If you want it pointed at yours:

- One working session, 45 minutes, just you and me.
- I look at how your business actually runs right now.
- You leave with a written shortlist: the one place AI pays you back first, and where it is a waste of your money this year.

**No deck. No pitch. If the answer is "not yet,"
I will say that.**

BOOK IT WHILE YOU ARE SITTING HERE

SCAN. PICK A TIME.

Point your phone camera at it.
Pick a slot before you stand up.

[calendly.com/boubacarbarry/
free-ai-audit-owner-operators](https://calendly.com/boubacarbarry/free-ai-audit-owner-operators)

You will not do it in the parking
lot and we both know it.

THINK OF ONE OWNER

One person who should have been in this room tonight. Not a list. One.

Send them the next date. I would rather fill the next room because you told someone than because I bought an ad.

YOUR TURN

FOUR MINUTES

WRITE IT DOWN.

I am not going to fill the silence.

ONE LAST ASK

SEND ME WHAT YOU WROTE

One paragraph is plenty. I read every one and I answer.

boubacar@catalystworks.consulting

Subject: Workshop report back, July 30

Inside two days, while you still mean it.

If you want it pointed at your business, book the free session.
