

EVERYTHING FROM TONIGHT

The slides, the three tools you built, seven more recipes,
and boxes you fill in that write the words for you. Nothing
left to copy off the screen.

PDF • DOWNLOAD AND KEEP IT TAKES ABOUT TEN MINUTES

OPENS IN THIS TAB • ARROW KEYS TO MOVE BUILT TO PRINT

READ THIS BEFORE YOU TYPE ANYTHING

NOTHING YOU WRITE HERE LEAVES THIS LAPTOP

You are about to type your prices and the decision keeping you up at night.
Fair to want to know where that goes. It goes nowhere. Every word stays in
your own browser, on this machine, and this page has no way to send it
anywhere even if it wanted to.

Try it at home. Turn the wifi off, open this page, and keep working. That is the
test, and it is the whole lesson in one page. Safe is something you can check,
not something you get told.

■ SAVED ON YOUR DEVICE ONLY

■ NEVER SENT ANYWHERE

■ NO ACCOUNT, NO SIGN IN

■ ZERO TRACKING

■ WORKS WITH THE WIFI OFF

DO THIS BEFORE 01

WHERE ALL OF THIS GOES

All of it ends up in one place. If you were in the room, you already have this open. If you are starting cold, it takes about two minutes.

01 Go to claude.ai and sign in, or make a free account.

02 Make a new **Project** and name it after your business. A project is a folder for one job, and it remembers what you put in it, so you are not re-explaining your business at the start of every new chat.

03 Come back here and start at 01.

Everything below lives inside that project. The link above opens in a new tab so you do not lose this page.

FIG. THE ONE THE OTHER TWO SIT ON

01 **YOUR BUSINESS BRAIN**

Fill it in once. Paste it in once. After that every answer comes back about your business, at your prices, in your voice, instead of generic advice for a business that does not exist.

What your business is

Plain words, the way you would say it to a neighbor.

EXAMPLE A two truck heating and air company in the south valley

What you sell

Your actual jobs, services, or products.

EXAMPLE Repairs, tune ups, and full system replacements

Who buys it

The customer who pays you, not the one you wish you had.

EXAMPLE Homeowners, plus a few property managers

The problem you solve for them

What is going wrong in their life when they call you.

EXAMPLE Their heat quit and they need somebody today

Your prices and packages

Rough numbers are fine. This is what stops it from inventing prices.

EXAMPLE Service call 89, tune up 149, replacements 6k to 12k

How you talk to customers

Your tone. Straight and plain, warm and chatty, formal.

EXAMPLE Straight, friendly, no sales pressure

Things you say a lot, and things you never say

This is what keeps it from sounding like a stranger wrote it.

EXAMPLE I say we will take care of it. I never say cutting edge, or best in class.

What you repeat every single week

The jobs that come back around whether you like it or not. These are the first things worth handing off.

EXAMPLE Writing quotes, chasing invoices, the schedule for next week, answering the same five questions

Your biggest goal right now

The one for this year, not the five year one.

EXAMPLE Add a second crew without working more Saturdays

STEP 2 COPY THIS, THEN PASTE IT INTO YOUR PROJECT INSTRUCTIONS

Here is my business, so every answer you give me is about my business and not a generic one. Use my prices, my customers, and my tone. Ask me if something here is missing.

My business is *(not filled in yet)*

I sell *(not filled in yet)*

I sell it to *(not filled in yet)*

The problem I solve is *(not filled in yet)*

My prices and packages are *(not filled in yet)*

My tone is *(not filled in yet)*

Things I say a lot, and things I never say: *(not filled in yet)*

My weekly repeating tasks are *(not filled in yet)*

My biggest goal right now is *(not filled in yet)*

Where it goes: open your project, find the instructions box, paste, save.
From then on you are working inside a tool that already knows your business.

02 YOUR DECISION COUNCIL

They argue your call from five directions. Then they read each other. Then a chairman steps out and says proceed, change, or kill. One of them says the thing you have been avoiding.

STEP 1 START IN THE PROJECT YOU ALREADY BUILT

Open a new chat inside it. Nothing to copy up here. Step 3 puts the council's instructions and your own decision into one block, and that is the only thing you paste.

STEP 2 NOW GIVE IT A REAL ONE

The decision actually sitting on you right now

Not a test question. The real one. Do I hire the second tech or wait. Do I raise prices in September. Do I let go of the client who pays late.

EXAMPLE Whether to hire a second technician now or wait until spring

What it would not know on its own

Optional. The numbers, the timing, the person involved, everything a textbook answer would miss.

EXAMPLE Booked out three weeks, turning away work, but winter is slow and payroll scares me

STEP 3 COPY THE WHOLE THING, READY TO PASTE

You are my Decision Council. When I give you a decision, work it in three passes.

PASS 1. Five advisors. One short paragraph each.

1. THE CONTRARIAN: argue hard against the decision.
2. FIRST PRINCIPLES: list the assumptions I am making and which ones are shaky.
3. THE EXPANSIONIST: describe a bolder, bigger version of this.
4. THE OUTSIDER: react with zero context, like a smart stranger hearing it cold.
5. THE EXECUTOR: give the first concrete step and the single thing most likely to kill it.

PASS 2. Peer review. Each advisor reads the other four and answers in one line: which one is strongest, and what did all five of us miss?

PASS 3. The Chairman. Step out of the five and close it out.

- Where do all five agree? That is the solid ground.
- Where do they split? Name the split. Do not smooth it over.
- What did the peer review catch that no single advisor saw?
- VERDICT: proceed, change, or kill. One sentence, and why.
- The first move, this week.
- The one question only I can answer.

Be direct. No flattery. Do not agree with me by default.

My decision is: *(type your decision in the box above)*

BONUS ONE MORE LINE

Assume this failed badly six months from now. Walk it back and tell me why.

ADD IT AFTER THE VERDICT. SAME COUNCIL, DIFFERENT JOB. IT TELLS YOU HOW THIS GOES WRONG BEFORE IT COSTS YOU ANYTHING.

03 YOUR SIMPLICITY CHECK

Give it a plan you are chewing on. It finds the simplest version that still works, and it tells you what to cut. Part three is the one that stings.

STEP 1 SAME PROJECT, NEW CHAT

Nothing to copy up here either. Step 3 puts the instructions and the thing you are overbuilding into one block, and that is the only thing you paste. Reuse it any time a plan feels heavier than the job.

STEP 2 WHAT ARE YOU OVERBUILDING

The plan, process, or thing you are building

A new service, a hiring process, a quoting system, a website, whatever has been getting bigger in your head.

EXAMPLE A new customer onboarding process with a welcome packet, a survey, three check in calls, and a photo report

What it is supposed to accomplish

Optional. It is what makes the answer sharp. What does done look like.

EXAMPLE Fewer people calling to ask what happens next, and more of them leaving a review

STEP 3 COPY THE WHOLE THING, READY TO PASTE

You are my Simplicity Check. When I give you a plan, a process, or something I am building, answer in four short parts:

1. WHERE IT IS OVERCOMPLICATED: name the parts adding weight, not value.
2. THE SIMPLEST VERSION THAT WORKS: describe the stripped-down core.
3. AM I SKIPPING THE BASICS: call out any boring fundamental I am missing.
4. CUT LIST: the specific things I can remove right now.

Bias hard toward simple. Favor the plain version over the clever one.
Be direct, no flattery.

Here it is: *(type what you are building in the box above)*

04 MAKE IT FOLLOW YOU EVERYWHERE

The council you just built lives inside one project. You have to go find it. A tool you have to go find is a tool you stop using by Tuesday. Three steps and it comes with you instead, into every conversation, on every device, whether you ever open that project again or not.

STEP 1 ASK CLAUDE TO PACKAGE IT

Open a new chat inside the project you built tonight and paste this. Claude writes the file. **If a download appears, take it. If one does not, take the ready made copy below.** Either one works, so do not wait on it.

Take the Decision Council instructions we used in this project and package them as a skill I can use outside this project.

Make a folder called decision-council with one file in it called SKILL.md.

At the top of SKILL.md put exactly this:

name: decision-council

description: Runs a decision through three passes. Five advisors argue it from five directions, then they peer review each other, then a chairman finds where they agree, names where they split, and delivers one verdict of proceed, change or kill. Use when the user asks for a decision council or brings a business decision they are weighing.

Under that, put the full Decision Council instructions, unchanged.

Then zip the decision-council folder and give me the zip to download.

If no download appeared, or it will not open, take mine. Same steps from here, nobody left behind.

STEP 2 UPLOAD IT TO YOUR ACCOUNT

This is the part that makes it yours for good. Four steps and a file picker.

- 01 **Settings, then Capabilities.** Check that *Code execution and file creation* is switched on. Most accounts have it on already. Switch it on if yours does not.
- 02 **Customize, then Skills.** This is a different menu from Settings. This is where people get lost, so look for the word Customize.
- 03 **The plus button, then Create skill, then Upload a skill.** Pick the zip you just downloaded.
- 04 **Switch it on.** The toggle sits with it in your skills list.

On a phone right now? Do this one on a laptop at home. The upload lives on the desktop site. And if the menu names moved since tonight, look for Skills. That is the one that matters.

STEP 3 PROVE IT FOLLOWED YOU

Open a brand new chat. Not the project, and nothing in it. Then ask it for the real decision you gave the council earlier, in one line, off the top of your head. Your own, not an example. If you cannot think of one, the line below works.

Run my decision council on this: whether to take on the customer who always pays thirty days late.

IT WORKS BECAUSE THE COUNCIL IS PART OF YOUR ACCOUNT NOW, NOT PART OF ONE CONVERSATION.

Then do the other two. Same three steps for the Business Brain and the Simplicity Check, with their own name and description in place of the council's. Do them before Monday buries it.

05 YOUR SEVEN RECIPES

Seven jobs you already do every week, each one already written for you. Take the two you need, the others will be here. Your answers stay on this laptop like everything else here, and what you paste into the AI tool afterward is between you and that tool.

ONE THE FOLLOW-UP EMAIL

For when you have been staring at the words “just following up” for ten minutes.

Who they are

EXAMPLE A roofing supplier rep

Your last contact, and when

EXAMPLE Met at the home show two weeks ago

What you want to happen next

EXAMPLE A 15 minute call

You write my follow-up emails in my voice: plain, warm, specific, one ask, under 120 words, no em-dashes, never "just circling back."

Here is the situation: *[who they are]* / *[your last contact, and when]* / *[what you want to happen next]*.

Draft the email. Then give me one shorter alternative.

For when you never remember to ask, and it comes out robotic when you do.

Text or email

EXAMPLE Text

Customer first name**What you did**

EXAMPLE Repaired her AC same-day

Review link

Paste your Google review link

Write a short *[text or email]* asking a customer for a Google review. Specific, warm, one tiny ask, includes the link. No begging, no "5 stars," 2-3 sentences max.

Customer: *[customer first name]*. What we did: *[what you did]*. Review link: *[review link]*.

Give me 3 variations.

Sunday night, and you are still moving names around.

People and availability

Paste it however you have it. Messy is fine.

Shifts to cover

EXAMPLE Mon to Fri, two techs on days, one on call weekends

Rules

EXAMPLE Max hours, who cannot work together, who holds which cert

Build a draft weekly schedule I will adjust. Respect every rule.

Start the response with a CONFLICTS & GAPS section (write 'None found' if empty), then the schedule below it. Do not silently break a rule.

People + availability: *[people and availability]*. Shifts to cover: *[shifts to cover]*. Rules: *[rules]*.

For when chasing money feels awkward, so you put it off another week.

Customer

Amount

EXAMPLE \$1,840

Invoice number

Days overdue

EXAMPLE 21

Pay link or method

EXAMPLE Your Stripe link, or check to the office

Write a 3-step invoice-chase sequence (gentle, direct, final), factual not threatening, each with an easy pay path.
Customer: *[customer]*. Amount: *[amount]*. Invoice #: *[invoice number]*. Days overdue: *[days overdue]*. Pay link/method: *[pay link or method]*.
Tell me which step to send today given the days overdue.

For turning messy intake scribbles into something you can send.

Your rough intake notes

Paste them exactly as you wrote them.

Your pricing logic

Leave it blank and it will hold the price as a placeholder.

Turn these rough intake notes into a clean first-draft proposal:
scope, included, not included, price [placeholder], next step.
Flag anything unclear as [CONFIRM] inline, then collect every
[CONFIRM] at the very end under a numbered list titled 'Before I finalize, I
need from you:'. Do not invent scope or numbers.
Notes: *[your rough intake notes]*. My pricing logic: *[your pricing logic]*.

The notes are in your notebook. You still have not sent them.

Your raw notes

Internal asides are fine. It keeps them out of the client version.

From my raw notes, produce two things: (1) a short client-ready
recap email, (2) an internal action list with owners and due
dates where stated. Keep anything internal OUT of the client
recap. Do not invent commitments.
Notes: *[your raw notes]*.

For thirty unread emails and no idea where to start.

Four or five messages

Start small. Four or five is the right size to see what it does.

Triage these messages. Tag each: REPLY-NOW / NEEDS-ME / FYI / IGNORE. For REPLY-NOW only, draft a short reply in my voice. Any message containing 'refund', 'charge', 'dispute', 'lawyer', 'legal', 'sue', or 'owe' = tag NEEDS-ME and write nothing else for it. Cap the demo batch at 4-5 messages. Draft only, never send.
Messages: *[four or five messages]*.

TOOLS CHANGE. PRINCIPLES DON'T

-
- 01 It predicts the next word from what you give it. What you hand it is the whole job.
 - 02 Give it your context once. Reuse it forever.
 - 03 Anything you repeat, turn into a saved recipe you own.
 - 04 Agentic means it does the work, not just answers you. You delegate.
 - 05 Pressure-test your thinking, then simplify it.
 - 06 Own it. Move it. Never get locked in.
-

The AI drafts. A human approves. Nothing carrying your name goes out without you reading it first. Not a quote, not a contract, not an email to a customer. That is the brake pedal, and it is the whole safety plan.

IF YOU WANT THIS POINTED AT YOUR BUSINESS

ONE WORKING SESSION. FREE.

Forty-five minutes, just you and me, looking at how your business actually runs. You leave with a written shortlist: the one place this pays you back first, and where it is a waste of your money this year.

No deck, and nothing to sign. This is worth your time when there is something in your week worth handing off. If there is not, I will tell you, and you will have saved yourself an afternoon.

VIRTUAL BY DEFAULT, OR IN PERSON IF THAT IS EASIER

ONE MORE THING

THINK OF ONE OWNER

One person who should have been in this room tonight. Not a list, one. Send them the next date. That is how the next room fills.

KEEP THIS PAGE

Bookmark it. Your answers stay on this laptop and they will be here next week when you come back for the next decision.

WHAT HAPPENS NEXT

SEND ME WHAT YOU WROTE

Whatever you wrote down in that last four minutes, email it to me. One paragraph is plenty. I read every one and I answer.

SEND IT TO

boubacar@catalystworks.consulting

WITH THE SUBJECT

Workshop report back, July 30

Within 24 to 48 hours, while you still mean it.
